Austbat Harp Trap

Sound design and selection of high quality lightweight materials result in a microbat Harp Trap that is:

Effective Excellent capture success combined with low escape rates, with a trap area of 4.2m² (1.8m x 2.35m), or 1m² for the Mini model.

Lightweight 12Kg for the 4.2m² Full sized model; 9Kg for the 1m² Mini model.

User friendly Quick to assemble, easy to adjust, no tools are required.

Corrosion resistant Made from high grade anodised aluminium and stainless steel.

Breathable canvas The weave of our bag fabric provides the perfect balance between breathability and tactility for microbats during their stay; our optional mold-resistant troppo bag is made of tough rot proof synthetic.

Interchangeable All components are precision machined, enabling smooth assembly. Parts are freely interchanged between traps if required. Future spare parts are guaranteed to fit the trap that you buy today.

Banks Available in 2-bank or 3-bank variants.
